

Improving profitability through pharmacy and supply management

The second highest cost of running a veterinary hospital is pharmacy and supply. Cubex helps turn pharmacy and supply into a profitable business to ensure efficient patient care, accurate charge capture and superior return on investment.

It's not just a solution ...
it's a strategy.

Pharmacy and supply as a business.

Surprisingly, most veterinarians lack a strategic plan to properly manage their inventory and are left with an inefficient system that wastes time, money and resources.

The power of Cubex is in the data provided that enables veterinarians to take a step forward in making informed decisions that control costs and improve profitability. Cubex business intelligence reports provide comprehensive analysis on consumption costs by hospital, department, and patient, detailed narcotic usage logs, inventory usage trends, inventory aging and discrepancy tracking.

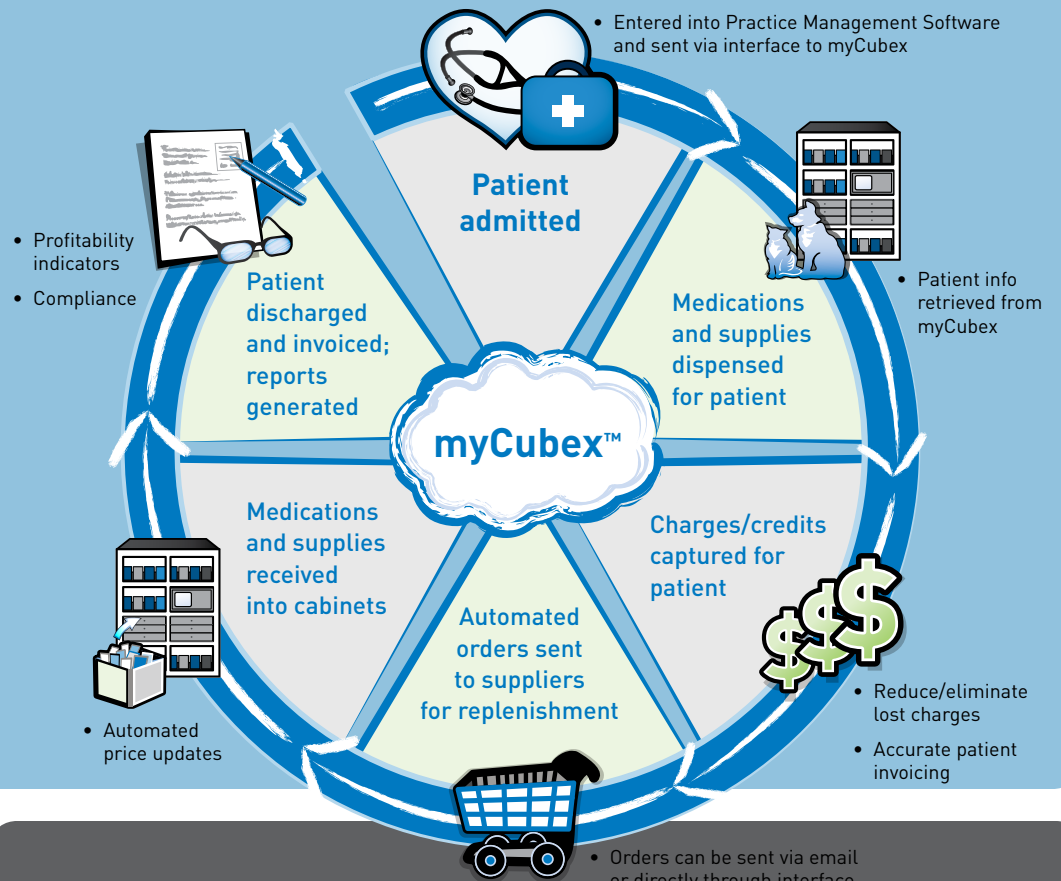

Enhanced productivity. Improved profitability.

Cubex pharmacy and supply solutions allow you to lower costs and increase revenue by effectively managing the access, control and tracking of pharmacy, supplies and narcotics. Cubex enables veterinarians to:

- Increase charge capture rates
- Decrease supply consumption
- Lower on-hand inventory levels
- Improve regulatory compliance
- Reduce labor costs
- Automate manual processes

myCubex Integrated Management Solution

The backbone of a solid solution is the capability to show results. myCubex sets the standard in inventory management for the Veterinary industry by allowing you to leverage your technology investment. The myCubex web-hosted database facilitates the day-to-day management of Cubex technologies for a single hospital, or across multiple hospitals, improving the overall performance of the supply chain while providing the data veterinarians require to make better-informed business decisions.

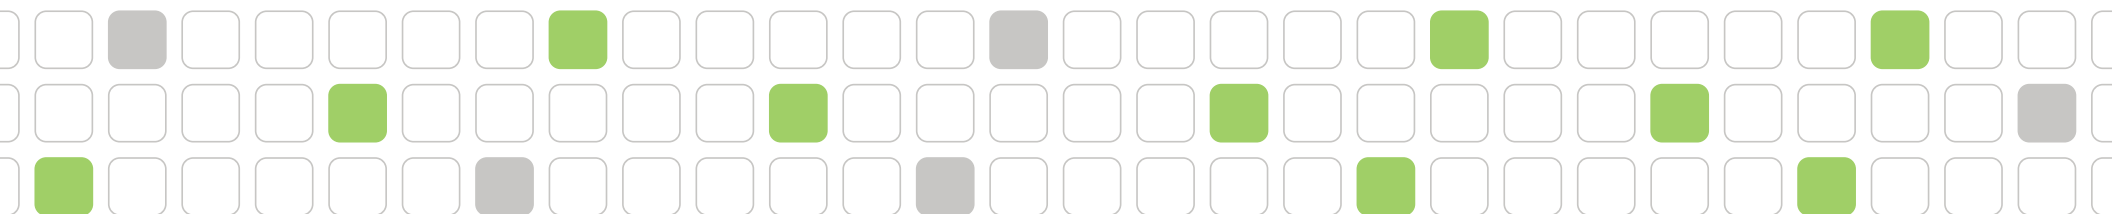

“It’s not just the control we get from the cabinet, it’s the data we get from it that allows us to run our hospital better. That’s what is most important to our profitability.”

Dr. Keith Richter, Veterinary Specialty Hospital of San Diego

Streamlined integration.

myCubex offers the capability to transfer information between existing practice management software and select supplier ordering systems. Integration capabilities include: automatic orders to suppliers, product pricing updates and pharmacy and supply usage by patient. This ensures that everything used is accurately accounted for, replenished and invoiced.

Cubex Profitability Improvement Components

Veterinarians are under growing pressure to lower costs and improve efficiency, while simultaneously ensuring compliance with increasing government regulations. The Cubex profitability components provide you with a strategic plan to improve the management of pharmacy and supplies and create a key profit center in your business.

- Assess current pharmacy and supply operations
- Develop effective inventory management processes and technology strategy
- Establish profitability metrics
