

Butler Schein Animal Health and ImProMed Launch Intelligent Inventory.

What is Intelligent Inventory?

Intelligent Inventory is a cloud-based solution that automates the inventory receiving process. By automatically uploading purchase information from Butler Schein Animal Health directly into Infinity's Inventory module, the veterinary professional saves almost 80% in labor time from the current method of ordering.

What are the benefits of ImProMed's FREE Intelligent Inventory solution?

- Saves order processing time
- Increases practice revenue
- Provides order accuracy
- Automatically updates inventory inside Infinity
- Reduces shrinkage
- Allows time to focus on better patient care

Reasons for a practice to use Intelligent Inventory:

Q. *Have you ever received the wrong amount of product into your purchase order?*

A. With Intelligent Inventory, the order item quantities are provided directly into your Infinity order receipt for processing.

Q. *Do you update your prices as often as you should be? Or only when you have "free time?"*

A. With this software, Intelligent Inventory software obtains cost information on ordered products shortly after the order is submitted to Butler Schein Animal Health; your pricing can then be instantly updated when the product(s) arrive and you receive the product into Infinity.

How can I see the process?

An overview video to help you learn even more about how Intelligent Inventory works can be seen at www.impromed.com/documents/IntelligentInventoryDemo_07112011.swf

I want to use Intelligent Inventory today, now what?

1. Go to www.intelligentinventory.com and click on the 'Register' tab; please note that there is no charge to register or for using Intelligent Inventory. Upon registering, an ImProMed customer support technician will contact you to ensure the current version of Infinity is installed (customers must be current on Infinity Application Support and be running Infinity v4.5 or newer).
2. Once the above step is completed, the process of placing your order does not change; orders are placed the same as they are today. So feel free to continue to have your orders arrive via your Butler Schein inside or local sales rep, or at www.ButlerSchein.com.
